

PLEX ERP Implementation Capabilities

PLEX

Knowledgeable

Our proven process

Accumulated lessons learned and input from our clients before, during and after PLEX implementations have solidified our process; proven to work in small business environments to large geographically spread enterprise organizations.

We know the plant floor

The ERP implementation team takes the time to understand your business processes, culture and objectives. We offer the experience of having managed the I.T. function for manufacturers with over one billion in annual sales and locations in five continents.

We listen to your team

We understand that listening to your employees closely, from the shop floor to the top floor, will make for a smooth transition to PLEX. Our team won't tell your team things you already know, and will stay focused on reaching the goals and timeline of your transition to PLEX.

We understand your business

Our mission is to identify opportunities that will optimize your business in every functional area throughout the organization. So that our clients can allocate resources on what matters most.

Systems X has been implementing PLEX as a customer before becoming a certified service partner.

Ours is a path of internal experience that transformed into empowering companies to leverage the PLEX Manufacturing Cloud for the automotive, aerospace and plastics industries.

We are a group of veteran I.T. professionals with the capabilities to ensure a smooth transition from existing processes to PLEX operations that's easy on employees, managers and your budget.

2003

Founded by Rubens Perdomo

2013

Launched Systems X as international MSP
Recognized Uruguay development office

2014

Became PLEX Certified service partner

2015

Acquired 12,000 SF Kentucky Field Office

2016

Launched PLEX Mexico Operations

Capable

Initial configuration and setup

Our implementation specialists will assist with the initial PLEX configuration to ensure that each step of your manufacturing process is accounted for. After the implementation is completed, we apply continuous improvement processes alongside your team that continue to drive down costs and improve results.

IT resource setup and training

From small to large PLEX launches, we have prepared PLEX workstation carts, IT infrastructure, wireless and network security components that play a critical role in the implementation process. Our team will ensure that each end user has a complete understanding of how to operate their function within PLEX, from the shop floor to the top floor.

Automotive background

Our roots are in the design, integration and management of IT functions within the assembly line process for global automotive suppliers and manufacturers. We have a deep understanding of ERP requirements for automotive part manufacturing, assembly and traceability.

Every step of the way

Our proven processes will lay the foundation for the PLEX implementation. With a project plan that is clearly defined, monitored and managed you can have peace of mind that your ERP transition to the PLEX Manufacturing Cloud will be completed on time and within budget.

Partners in your business success

Small and large manufacturing operations benefit from implementing PLEX with Systems X. We realize that technology is a key component to the success of today's business world and helping companies use it effectively is what we do. Our clients benefit from the combined experience of our staff as well as the cost conscious approach we use.

Systems X develops long-term relationships with our clients as their trusted technology advisor
